

MPS INDUSTRIES

About Us

MPS Industries is a trusted name in the supply of high-quality label stocks and allied materials. Our promoters bring over **25 years** of industry experience, having been associated with a reputed Indian label stock manufacturer before establishing **MPS Industries in 2009**.

Initially focused on gumming sheet products, we gradually expanded into complementary label stock solutions to meet the growing needs of various industries. Within a short span, MPS has established itself as a **reliable manufacturer and trader known for quality, consistency, and customer commitment**.

Our growth is driven by a strong focus on **customer satisfaction**, delivering **premium products, timely supply, and adherence to the highest quality standards**. As a **customer-centric organization**, we prioritize understanding client requirements and providing solutions that meet their expectations in **both quality and scale**.

Our Products

01

Chromo Acrylic Label

High-quality chromo paper with acrylic adhesive offering excellent print clarity and durability. Ideal for applications requiring strong adhesion and long-lasting label performance.

02

Chromo Hot-Melt Label

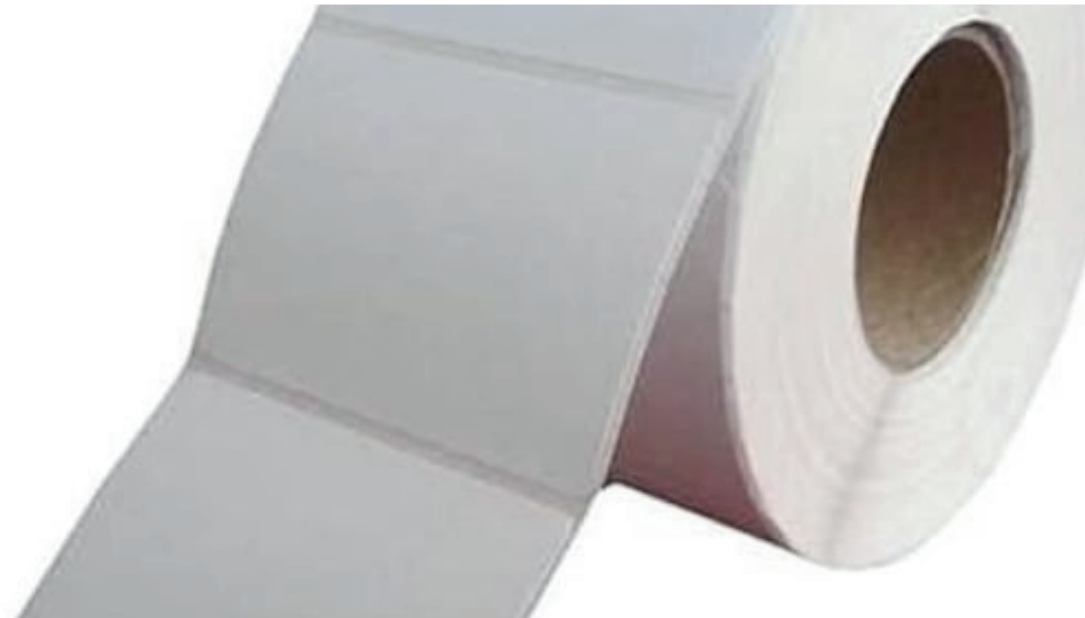

Suitable for High-speed labelling processes and best used for Pharmaceutical Industry

03

High Gloss Mirror-Coat

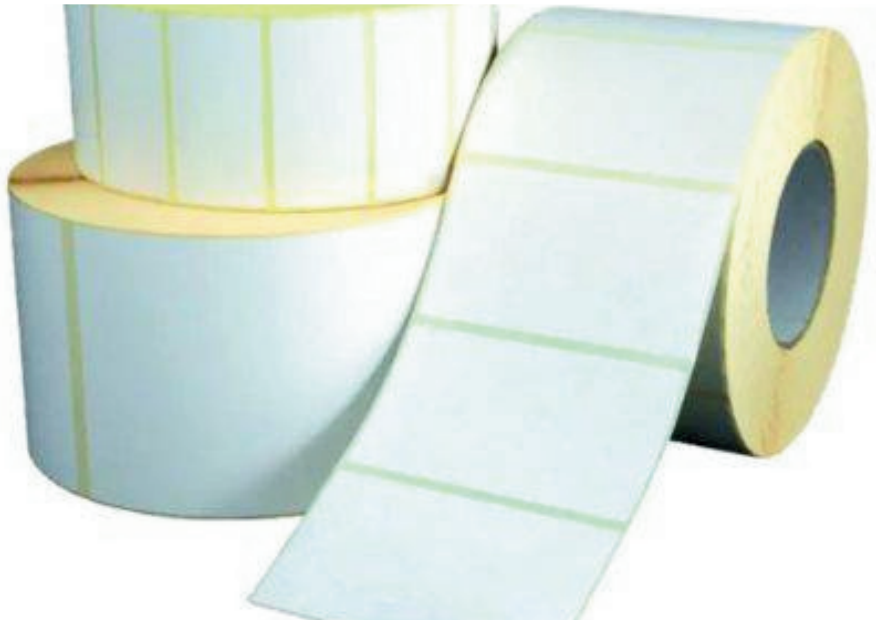

Premium glossy paper that delivers a smooth mirror-like finish for superior print quality. Perfect for premium packaging and product labels requiring a high-end appearance.

04

Direct Thermal Top & Non-Top Coated

Thermal paper with protective top coating for enhanced resistance to heat, moisture, and scratches.
Commonly used in barcode labels, logistics, and retail applications.

05

Direct Thermal Non-Tearable

Durable thermal material designed to resist tearing and harsh handling conditions.
Ideal for applications requiring long-lasting labels in demanding environments.

06

Maplitho Paper

High-quality uncoated paper known for excellent printability and smooth surface finish.
Commonly used for general labeling and printing applications.

07

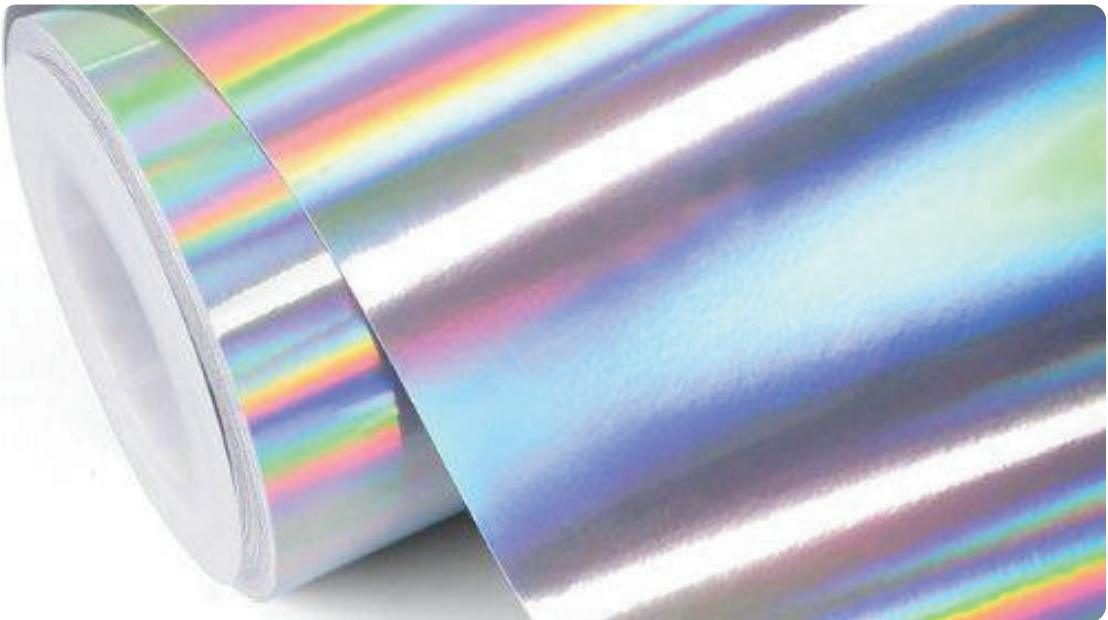

Metallised Silver

Metallic finish label stock that provides a premium and eye-catching appearance. Perfect for cosmetics, beverages, and luxury product packaging.

08

Holographics

Specialized holographic label material offering unique visual effects and security features. Ideal for brand protection, premium packaging, and anti-counterfeiting applications.

09

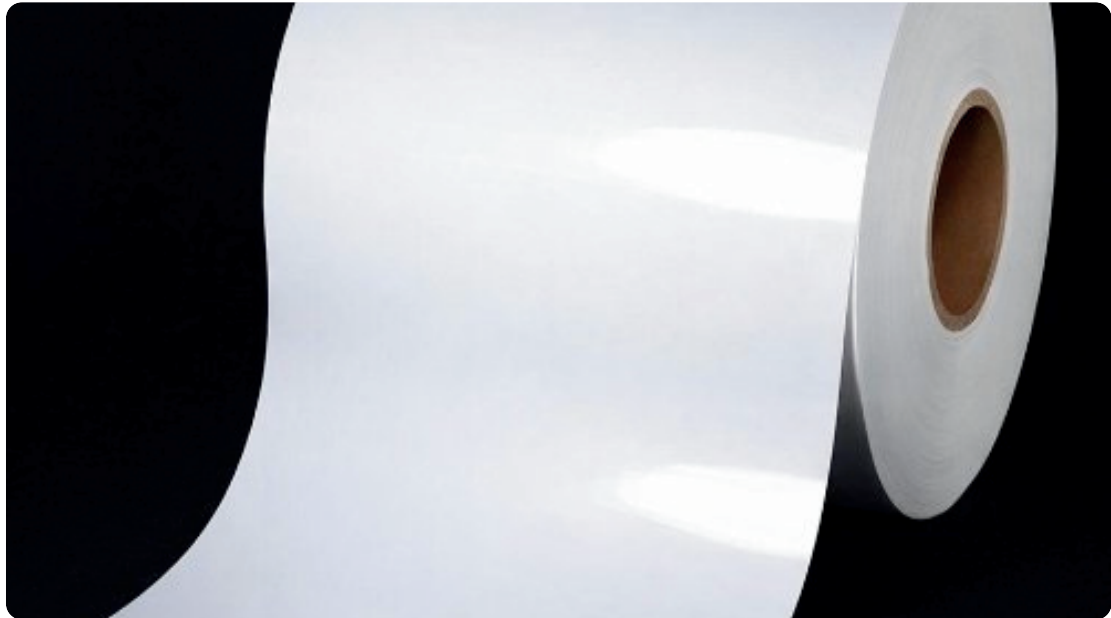

Matt Chromo Label (90 – 170 GSM)

Matte-finish coated paper providing excellent print clarity without glare. Suitable for product labeling where a subtle and elegant finish is required.

10

PP White

White polypropylene film with excellent durability and resistance to moisture and chemicals.
Ideal for long-lasting labels used in industrial and consumer product packaging.

12

PP Silver

Silver polypropylene film that provides a metallic aesthetic with strong durability.
Commonly used for premium branding and durable product identification labels.

11

Release-to-Release

Specialized label stock designed for applications requiring easy release and handling.
Ensures efficient labeling performance in automated processes.

13

PP Clear

Transparent polypropylene film designed for a clean and seamless “no-label look.” Perfect for packaging where product visibility and aesthetics are important.

14

Security Label

Specially designed labels that protect products against tampering and counterfeiting. Widely used in pharmaceuticals, electronics, and high-value product packaging.

15

Tamper Evident

Labels that reveal visible signs when tampered with or removed. Essential for ensuring product authenticity and consumer safety.
